

The wax guard system for hearing care professionals

Product presentation

Organised. Efficient. Less single-use waste.

CerumClear GmbH & Co. KG

Designed for everyday hearing aid servicing

02

An organised wax guard system for frequent replacements, multiple hearing aid brands and routine servicing

5

Wax guard sizes

12

compatible systems

One ClearBox

Keeps wax guards and replacement tools in one place, supporting a consistent replacement process.

Made in Germany

CerumClear manufactures its wax guards in Germany using precision micro-injection moulding.

Inspired by everyday hearing care practice. Built for professional use.

Conventional systems create complexity and single-use waste

03

Multiple packs, tools and product variants complicate frequent wax guard changes at the service bench

1

Multiple separate systems

Different wax guards, packs and tools need to be kept on hand.

2

Time spent searching

Small inefficiencies add up with every replacement.

3

Single-use parts after every change

Discarded packaging and applicators add to waste.

4

More products to stock

Multiple variants increase storage needs and purchasing workload.

The ClearBox brings wax guards, tools and refills together

Five dedicated compartments make every size easy to identify and access

What is included

5 colour-coded wax guard sizes

5 matching replacement tools stored in the lid

Loose wax guard refills supplied in bulk

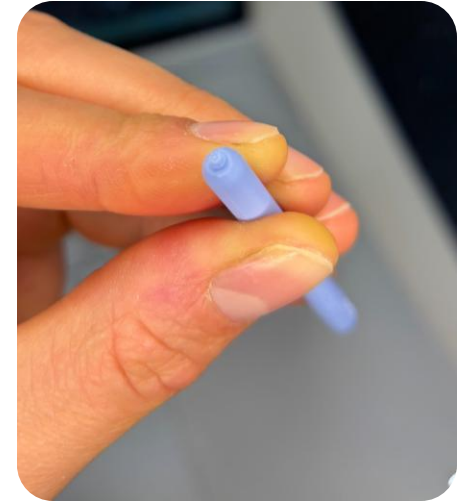

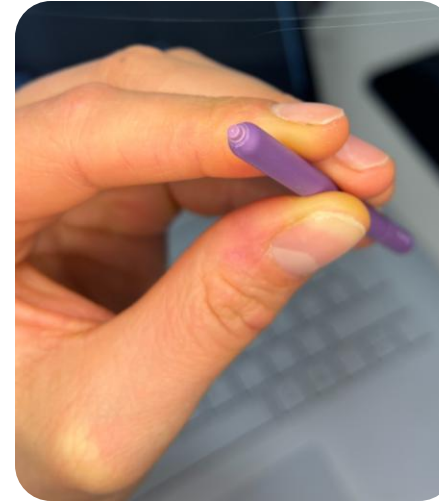

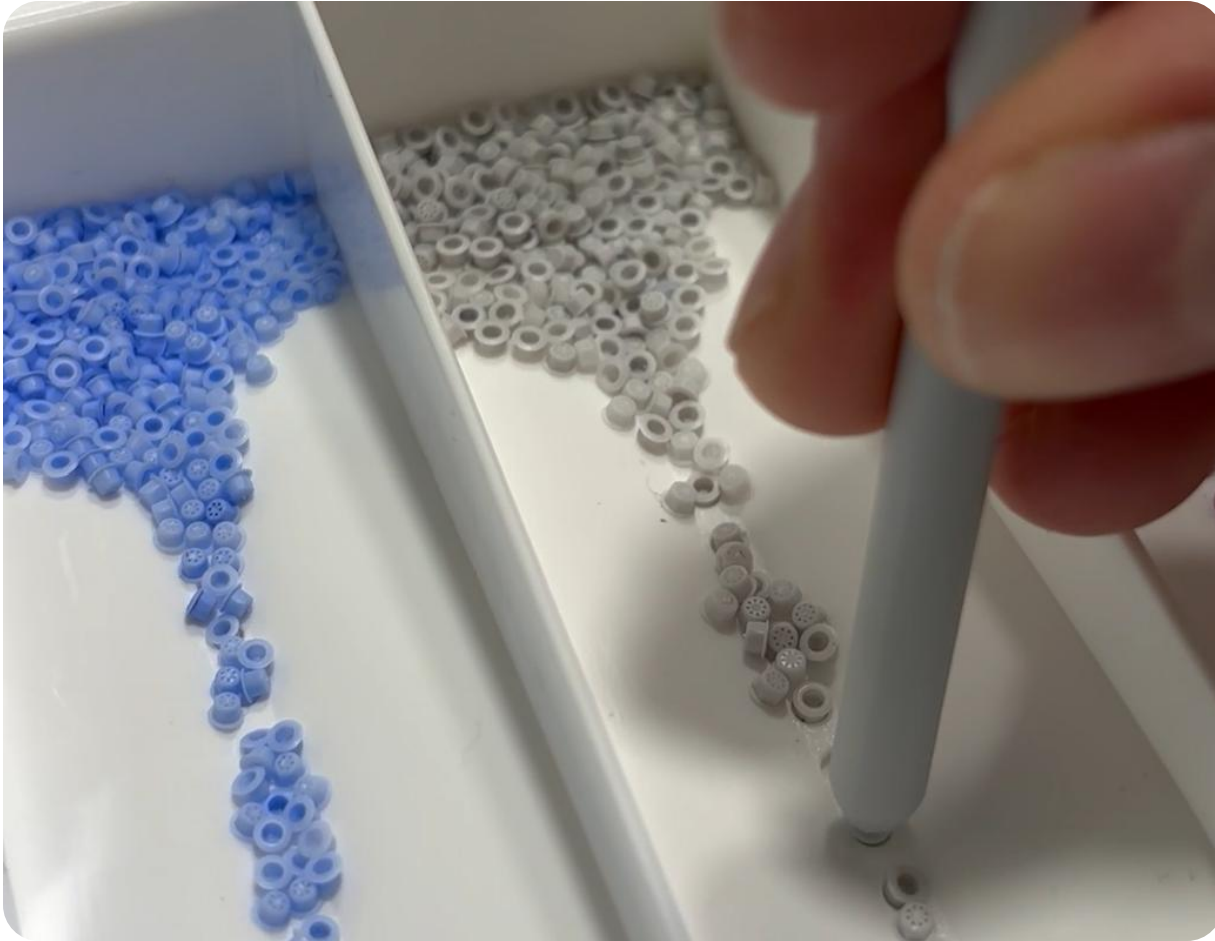

Reusable ClearBox and tools

Each size has its own place in the patented ClearBox. Refill only what you need.

The sliding guide positions each wax guard for pickup

05

Pick up the wax guard with the tool and insert it directly into the hearing aid

1 Open the correct compartment

2 Slide a wax guard forward along the channel

3 Pick it up and insert it

The dedicated compartment keeps loose wax guards in place and makes selecting the right size straightforward.

Five sizes are compatible with twelve common systems

06

Colour coding and dedicated compartments make identification easy at the service bench

5

Wax guard sizes

12

compatible systems

CerumClear	Colour	Compatible with
Clear 1.3	Green	CeruStop, ProWax MiniFit, NanoCare, WaxGuard
Clear 1.7	Blue	HearClear, CeruShield Disc
Clear 2.1	Grey	NoWax, ProWax
Clear 2.3	Purple	HF4 wax guard, QuickGuard
Clear 3.0	Turquoise	HF-3 wax guard, CeruStop XL

Why CerumClear stands out

07

Compatibility, thoughtful design and reusable components in one system

1

Broad compatibility

Five sizes for twelve commonly used wax guard systems.

2

Patented ClearBox

Wax guards and tools stay organised in one place.

3

Integrated sliding guide

Positions each wax guard for easy pickup.

4

Bulk refill packs

Replenish only the sizes you need.

5

Reusable components

Keep using the ClearBox and replacement tools.

6

Clear colour coding

A fixed colour and position for every size.

7

Built for professionals

Designed for frequent wax guard changes at the service bench.

8

Made in Germany

Precision wax guards made using micro-injection moulding.

From independent practices to multi-site hearing care groups

08

CerumClear supports individual service benches and centrally managed practice networks

Everyday wax guard replacement

Fast access to frequently used sizes.

Multi-brand servicing

One system supports hearing aids from different manufacturers.

Multi-site practices

Consistent procedures and equipment across locations.

Centralised purchasing

Fewer variants simplify ordering and product records.

Onboarding new team members

Clear colour coding and fixed locations make the process easy to learn.

Sustainability initiatives

Reusable tools and bulk refills reduce single-use materials.

Practical business benefits for hearing care providers

09

Value across servicing, stock management and procurement

1

Potential cost savings

Bulk refills replace repeated purchases of packaged systems.

2

Less packaging waste

Loose wax guards reduce discarded packaging and tools.

3

A more organised workbench

Dedicated compartments reduce searching and stock mix-ups.

4

Fewer items to order

Five sizes cover twelve common wax guard systems.

5

Less storage space

One ClearBox holds the wax guard sizes and tools.

6

Fewer product codes

A streamlined range simplifies product records.

7

More targeted stock control

Reorder only the sizes you actually need.

8

Consistent replacement process

Teams follow the same straightforward procedure.

Actual savings depend on replacement volumes, your existing product range and purchasing processes.

Manufacturing, supply and customisation

10

German manufacturing backed by a scalable refill concept

Micro-injection moulding in Germany

CerumClear manufactures its wax guards in East Frisia, Germany.

Starter kits for a complete setup

A ClearBox, five wax guard sizes and five replacement tools provide the essentials. Refill packs replenish individual sizes.

Customisation for partners

The ClearBox offers a prominent space for a partner logo and can be integrated into standardised supply programmes.

Discover CerumClear

The next steps depend on your service requirements

- 1 Confirm compatibility and requirements
- 2 Choose the right starter kit
- 3 Trial the system in your daily workflow
- 4 Agree on supply arrangements and terms
